

## **Short Exposé**

Master thesis: Inclusion and job satisfaction of physically impaired speech-language pathologists - an empirical-quantitative study in an international context

Survey from:	Laura-Jane Geraldine Bur
University:	DIPLOMA
Partizipation period:	As of now
Target group:	International subjects who are in the field of action of speech therapy, physical impairment on the upper or lower extremities, persons aged 18 to 65 years
Duration:	about 10 minutes

Dear Speech and Language Therapists,

As part of my master's thesis, I am conducting an online survey on the topic of "Inclusion and job satisfaction of physically impaired speech and language therapy professionals - an empirical-quantitative study in an international context".

The aim of the study is to investigate the impact of inclusion of physically impaired speech-language pathologists on their satisfaction in the professional environment.

In context of my empirical research, I am seeking international subjects who are currently in training or in the profession of speech-language pathology. In addition, the target population is limited to individuals with physical impairments of the upper or lower extremities and can be conducted between the ages of 18 and 65. In case you do not correspond the target group please do not take part in the study.

Note: When the questionnaire refers to a "speech-language pathology or professional setting," this refers to both the period of education and the daily professional life of the participating individuals.

At the beginning of the study you will be asked general questions about yourself, before you are asked to answer the questions about inclusion and job satisfaction. Questions regarding your personal data complete the online questionnaire.

Participation in the survey is anonymous and, self-evidently, voluntary. Personal data will not be viewed and/or traced by third parties.

It will take about 10 minutes to complete the questionnaire.

By taking the time with filling out my survey you would support me greatly. Please feel free to distribute the link, with regards to the target group

If you are interested, I would be very happy to send you the results of my thesis after its completion.

Thank you very much for taking the time to support me!

With kind regards

Laura-Jane Bur, 850136@stud.diploma.de
