

STUTTERING

Foundations and Clinical Applications

SECOND EDITION

EHUD YAIRI • CAROL H. SEERY

Stuttering: Foundations and Clinical Applications, Second Edition, is considered the most comprehensive, complete presentation of the science and treatment of stuttering available in a single text—how stuttering is explained, and how stuttering is treated. The text is unique in its coverage of the stuttering population, its in-depth look at stuttering therapy at various ages, and its original approach that invites students to offer critical appraisals of differing theoretical viewpoints.

The new Second Edition:

- Has been revamped editorially to ensure ease of readability;
- Highlights sections with the latest scientific knowledge of stuttering regarding incidence and prevalence, onset natural recovery, and genetics;
- Includes completely revised sections on brain anatomy and physiology, motor aspects, and cluttering; and
- Updates the material with new case studies, tables and figures, and a new outline format for treatment procedures.

Ehud Yairi, Ph.D. (Iowa), CCC-SLP

University of Illinois at Urbana-Champaign; Tel Aviv University

Professor Yairi is an internationally recognized expert on stuttering. A recipient of several major grants from the National Institutes of Health, his research and clinical work on many aspects of the disorder throughout the age range, especially in children, has incorporated both environmental and genetic factors. Yairi is the recipient of the Honors of the Association (the highest award of the American Speech-Language-Hearing Association), the Researcher Award of Distinction (from the International Fluency Association), and the Malcolm Fraser Award for excellence in the field of stuttering (from the Stuttering Foundation of America) as well as other awards. He is the author (with Noline Ambrose) of *Early Childhood Stuttering* (2005), as well as of numerous scientific articles.

Carol Hubbard Seery, Ph.D. (UW-Seattle), CCC-SLP

University of Wisconsin-Milwaukee

Professor Seery has engaged in teaching, research, and clinical service related to stuttering for more than 25 years. She has worked professionally in school, hospital, and university settings. Seery was among the inaugural cadre of board-certified specialists in fluency disorders and has made presentations on stuttering to clinicians in various settings. She received National Institutes of Health grant support, has authored and coauthored multiple articles in scientific journals, has been an editorial consultant for several scientific journals, and serves on the editorial board for the *Journal of Communication Disorders*. Currently, she serves as the Chairperson of the UWM Department of Communication Sciences and Disorders.
